BVS Consulting Launches Global Operations

Boutique Technology Consulting Firm Leverages 18+ Years of Telecom and Data Sector Clout to Propel Customers' Expansion within the International and Wholesale Communities.

MIAMI, FL, JULY 22, 2014 –BVS Consulting, a boutique consultancy for technology companies looking to accelerate growth with partnerships in international telecommunication networks, hosting services, data center managed services, and application and content delivery services, launched today. The company provides consulting services on Network, Data Center, Cloud and Investment solutions for technology providers seeking to enter or expand their business within the international and wholesale telecommunication communities.

BVS Consulting advises clients on how to build advanced infrastructure and managed services that deliver the scale, security and reliability sought by today's global carriers, enterprises and government entities by sourcing and developing state-of-the-art, Tier-1 data center facilities and the services that enable their operations. The consultancy also directs telecommunication companies on how to design and build sophisticated Fiber Optic and Metro Ethernet networks that facilitate the exchange of traffic at a global level.

Additionally, BVS Consulting specializes in MEF Certification coordination; Enterprise Cloud solutions; Software-as-a-Service (SaaS); Desktop-as-a-Service (DaaS); and Interconnection services, including Optical and Electrical Cross-Connects and Peering, Lit Connectivity, Wavelengths and Dark Fiber services, Hubbing to interconnect domestic and international traffic, Colocation, and Communications Access Management.

"At BVS Consulting, we combine deep insights into the global technology landscape with proven methodology and strategic alliances to deliver cutting-edge solutions for diverse tech companies," says Benjamin Von Seeger, President and CEO of BVS Consulting. "BVS excels at connecting with our customers on a greater level, understanding requirements and exceeding specific needs with custom-tailored Network, Data Center, Cloud and Investment solutions as well as strategic go-to-market plans that build high-growth, successful businesses."

The firm's successes include the development of over 1,000,000 sq. ft. of data center space throughout key technology hubs including Miami, São Paulo, Madrid, Beijing, Santa Clara, Los Angeles, Chicago, New York City, New Jersey, Washington, D.C., and beyond. BVS Consulting's special project portfolio also comprises working with leading telecommunications providers to develop resilient communications infrastructure for the Sochi 2014 Winter Olympics as well as the 2014 FIFA World Cup™.

BVS maintains proven experience in M&A as well as securing multimillion-dollar contracts from the largest national and international telecom carriers, content providers and other major corporations from Latin America, Europe, Asia and the United States.
